PROFILE

I am a passionate individual with a keen interest in collaborative game development.

My enthusiasm lies not only in creating engaging gaming experiences but also in utilizing my strong data analysis skills to glean valuable insights. Combining creativity with analytical prowess, I am dedicated to contributing innovative solutions to the dynamic field of game development.

CAREER GOALS

- I am a chemistry student with a strong desire to transition into the field of information technology and data. I am prepared to learn, work, and grow alongside VNG, bringing my dedication and adaptability to contribute effectively in the dynamic realm of technology and data
- I have experienced various genres of games: Legend of Zelda, Sekiro, Genshin Impact, Internet simulation, Play Together, Runeterra, Pokemon TCG, LoL, Liên Quân Mobile, Tốc Chiến

Now, I aspire to take on roles as a game publisher or developer, aiming to contribute and enhance the development of engaging game titles
